

AAC BLOCK ADHESIVE

PRODUCT DESCRIPTION

AAC Block Adhesive is a factory prepared blend of carefully selected raw materials, Portland cement and graded aggregates and polymers. Designed for use with water to produce high strength thixotropic mortar, for laying Aerated Light weight concrete, Fly ash bricks, cement hollow blocks, Cellular concrete blocks or smoothing over the block work surface in layers of up to 12mm thickness, that meet and exceed the requirements of National and International Standards.

Application

For interior and exterior use for preparing thin bed adhesive for AAC, ALC and cellular concrete blocks.

Advantages

- High Strength
- No curing required after block work is done.
- Flexible, shock & impact resistant
- Improved adhesion between two blocks
- improved bond strength, compressive & tensile strength
- Thin jointing with high adhesion to contribute to load bearing capacity of masonry
- easy to use
- Long working time
- Fast & economical

Suitable Substrates

- Concrete Blocks
- Cement Mortar Blocks/Bricks
- Concrete hollow blocks
- Aerated Light weight blocks
- Cellular concrete blocks
- Fly Ash Bricks

Packaging – 20 Kg & 50 kg bag

Colour: Grey

Coverage

Coverage is based on smoothness and evenness of the substrate, size of blocks used and the thickness of mortar used. A general guide line for coverage of mortar is given when used with 30% Water is added to powder

NOTE: Coverage depends on the substrate evenness and the thickness at which the AAC Block adhesive is applied.

Thickness	Coverage for 50 Kg bag	Coverage for 20 Kg Bag
3 mm	125 Sft	50 Sft
6 mm	62 Sft	25 Sft
9 mm	42 Sft	17 Sft
12 mm	31 Sft	13 Sft

Coverage of AAC Block adhesive when applied at 3mm thickness is approximately 2.5 Sft per Kg.

Shelf Life

Factory sealed bags of this product are guaranteed to be of first quality for one (1) year* if stored off the ground in a dry area, at 21°C and 50% RH.

*High humidity will reduce the shelf life of bagged product

Limitations

• Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproof membranes. When a waterproof membrane is required, use a LATICRETE Waterproof Membrane

Cautions

- During cold weather, protect finished work from use until fully cured.
- Contains Portland cement and silica sand. May irritate eyes and skin. Avoid contact with eyes or prolonged contact with skin. In case of contact, flush thoroughly with water.
- Do not take internally. Silica sand may cause cancer or serious lung problems. Avoid breathing dust. Wear a respirator in dusty areas.
- Keep out of reach of children

TECHNICAL DATA

Applicable Standard

Conforms to ANSI A118.1 & ANSI A118.4-1999

Performance Properties

AAC BLOCK ADHESIVE mixed with water

Test	Results
Compressive strength	17.5 MPa
Flexural Strength	3 MPa
Tensile Adhesion strength	1.2 MPa

Working Properties

AAC BLOCK ADHESIVE mixed with water (70°F (21°C))

Pot Life	1 Hour
Open Time	30 Minutes

Time to Plaster	24 hours
Time to full dry hard	14 Days
Wet Density	1750 kg/m ³

Specifications are subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions

INSTALLATION

Surface Preparation

All surfaces should be between 40 °F (4°C) and 90°F (32°C) and structurally sound, clean and free of all dirt, oil, grease, concrete sealers or curing compounds. Rough or uneven concrete surfaces should be made smooth with MYK LATICRETE Latex Portland Cement underlayment to provide a wood float (or better) finish. Installation may be made on a damp surface.

All slabs must be plumb and true to within ¼" (6mm) in 10 ft (3m).

Follow ANSI Specification AN-3.8 "Requirements for Expansion Joints" or TCA Detail EJ171 "Expansion Joints". Do not cover expansion joints with mortar.

Mixing

Use approx. 50kg of AAC Block Adhesive thin bed mortar with Approx. 15 ltrs of potable water. Take water in the container and slowly add the powder into the water while mixing by hand or slow speed mixing machine. Mix for 3 to 5 minutes till a smooth thixotropic mix without lumps is obtained.

Application

1) Thin bed mortar for laying blocks:

Before placing mortar, ensure the block work to be dry and surfaces cleaned properly. Place the mixed mortar on the block work in thin layers of 2 to 3 mm (or as required by engineers at site) using trowel and place the next layer of blocks on the mortar. Keep joints between the blocks as required by the site engineers and fill the joints with the mixed mortar, using a trowel. Check the plumb of the wall while laying the blocks to keep the walls perfectly vertical to the plumb.

2) Smoothing over the block work:

Before placing mixed mortar, apply a bonding layer of 1 to 2mm thick AAC Block Adhesive mortar using a trowel pressing down on the block work. Then apply AAC Block Adhesive at a thickness of 8 to 10mm and smoothen using a sponge or rubber / wooden float.

3) As Adhesive to install tiles:

AAC Block Adhesive can be used as a thin-set adhesive to install tiles/stones on AAC Block/Fly ash brick walls. Use a

suitable notch trowel to achieve desired thickness of adhesive for installation of tiles /stones on the wall

Plaster

Plumb, square and true concrete block wall can be finished with the applications of Special polymer plaster from MYK Laticrete.

Plasters made with site mix may slump and powder due to water absorption of the block work.

Cleaning

Clean tools and containers with water while mortar is fresh.

AVAILABILITY AND PRICE

Availability

LATICRETE and LATAPOXY® materials are available worldwide.

For distributor information:

Telephone: +91-40-30413100

FAX: +91-40-23378784

e-mail: contact@myklaticrete.com

Price

Contact a MYK LATICRETE representative / Authorized dealer in your area.

MAINTENANCE

LATICRETE and LATAPOXY grouts require routine cleaning with a neutral pH soap and water. All other LATICRETE and LATAPOXY materials require no maintenance but installation Performance and durability may depend on properly maintaining products supplied by other manufacturers.

WARRANTY

MYK LATICRETE India Pvt Ltd warrants that AAC BLOCK ADHESIVE, Thin bed mortar is free from manufacturing defects and will not break down, deteriorate or disintegrate under normal usage for a period of one (1) year from date of manufacture, subject to the terms and conditions stated in MYK LATICRETE Product Warranty

TECHNICAL SERVICES
